Faculty & Postdoctoral Positions Available!

School of Artificial Intelligence and Automation
Huazhong University of Science and Technology

| ¥ 900+ Million	40	120+	2800+
Research projects amount	**National major projects**	**Faculty Members**	**Students**
in past 5 years	*in past 5 years*		

The School of Artificial Intelligence and Automation (AIA) at **Huazhong University of Science and Technology** (HUST) invites applications from exceptional young scholars and researchers to join us as **full-time faculty members and postdoctoral fellows**. Prospective candidates should possess an excellent academic background including a doctoral degree obtained from prestigious universities or renowned research institutions.

Major Directions

- ☐ Intelligent control theory
- ☐ Embedded intelligent information processing systems
- ☐ Multispectral sensor technology
- ☐ Decision making, optimization & complex systems
- ☐ Complex scene perception & understanding
- ☐ Brain-computer interface and rehabilitation robotics
- ☐ Collective intelligence & autonomous unmanned systems
- ☐ Industrial control system security & intelligent equipment
- ☐ Multispectral imaging target identification in remote sensing

- ☐ Intelligent manufacturing & operations maintenance
- ☐ Machine Vision
- ☐ Neuromorphic intelligent information processing
- ☐ Intelligent traffic decision support & platform
- ☐ Medical assisted diagnosis
- ☐ Smart grid & new energy technology
- ☐ Biocomputing & storage
- ☐ Advanced sensor theory
